Company profile

Airuide Science and Technology Co., LTD was founded in 2017, the company is located in the unique world famous Wenzhou, Zhejiang. The company has independently developed intelligent pedal electric bicycles, intelligent electric scooters, intelligent walking tricycles, intelligent terminal wheelchairs and other products, which involve many fields such as fitness, entertainment, travel, sports and so on. The product is a low-carbon environmental protection, outdoor cycling, home fitness as one of the multi-purpose intelligent sports products.

Corporate vision

To become the world's leading intelligent electric vehicle technology company.

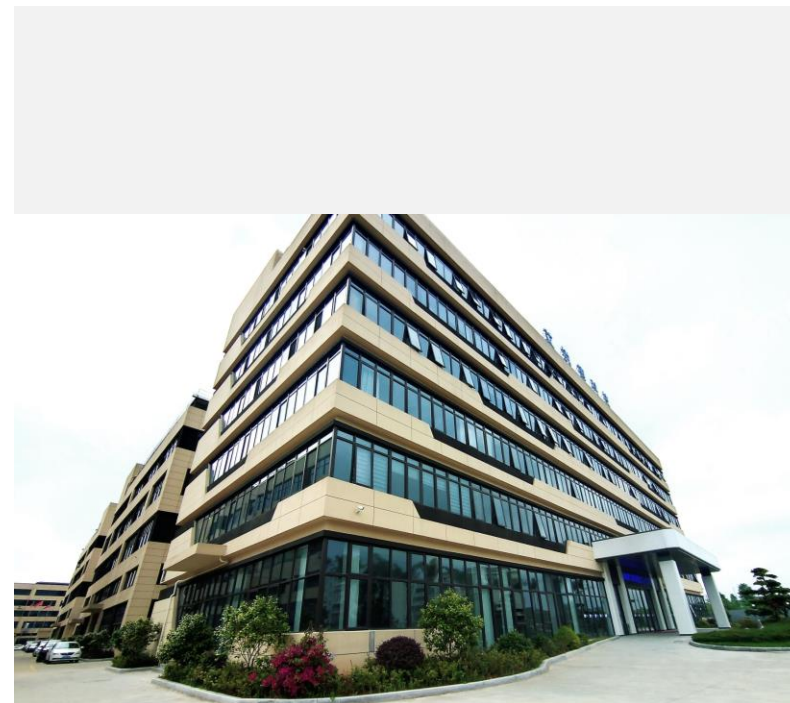

Enterprise core values

Integrity, pragmatic innovation.

Enterprise mission

Create a better life for customers, create opportunities for employees, and create benefits for the country.

Look to the future

Airuide Science and Technology Co., LTD is a high-tech enterprise focusing on the research and development, production, sales and after-sales service of intelligent electric vehicles. The company adheres to the business philosophy of "integrity-based, focus on innovation" and takes "science and technology first, establish industry benchmark, create international brand" as the quality policy. We are committed to creating a "large-scale, modern and international" well-known high-tech enterprise in the global intelligent electric bicycle industry, and we are willing to set a new benchmark for the intelligent electric bicycle industry with high-quality products and sincere service.

R&d team

We have a highly skilled and experienced high-level product research and development team, and a group of outstanding talents from science and technology institutions and well-known enterprises.

Our team pays attention to cutting-edge technology trends, and has been engaged in artificial intelligence, big data, blockchain, Internet of Things and other fields for a long time, with excellent communication skills and efficient work ability. We also implement strict quality management, and implement standardized software engineering processes for each project to ensure product quality and stability of engineering implementation.

Finally, our R & D team has always adhered to the spirit of "always on the road, constantly challenging ourselves, advancing with The Times", taking customer satisfaction as the goal, constantly pursuing excellence and innovation, and providing customers and the company with more quality and efficient services and solutions.
